

# Data requirements

## How you can transfer data:

- E-mail (no size restriction)
- Wetransfer.com
- FTP-server

## Programs we can process:

-  Highres PDF (hl-repro preferred file format)
-  Artpro
-  Illustrator
-  InDesign

## Image/picture data:

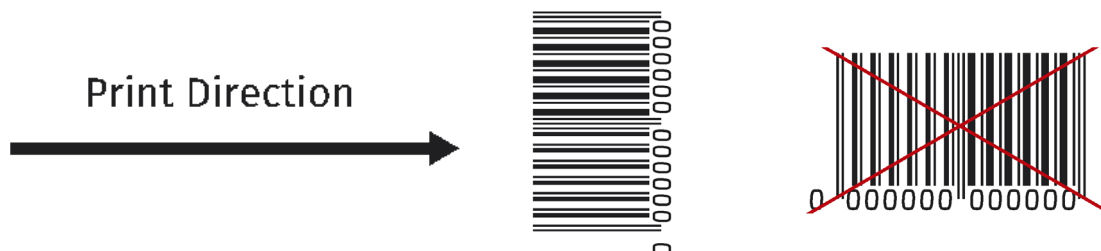

-  Photoshop:
  - \* **Resolution: Minimum 300 dpi**
  - \* Colour mode: RGB, CMYK
  - \* fileformat:
    - .psd in layers (hl-repro preferred file format)
    - .jpg ( saved without compression in quality 12)
    - .tif

## Files needed:

-  /  Artwork file with outlined text.
-  Highres PDF
-  folder containing Links/Images
-  folder containing Fonts

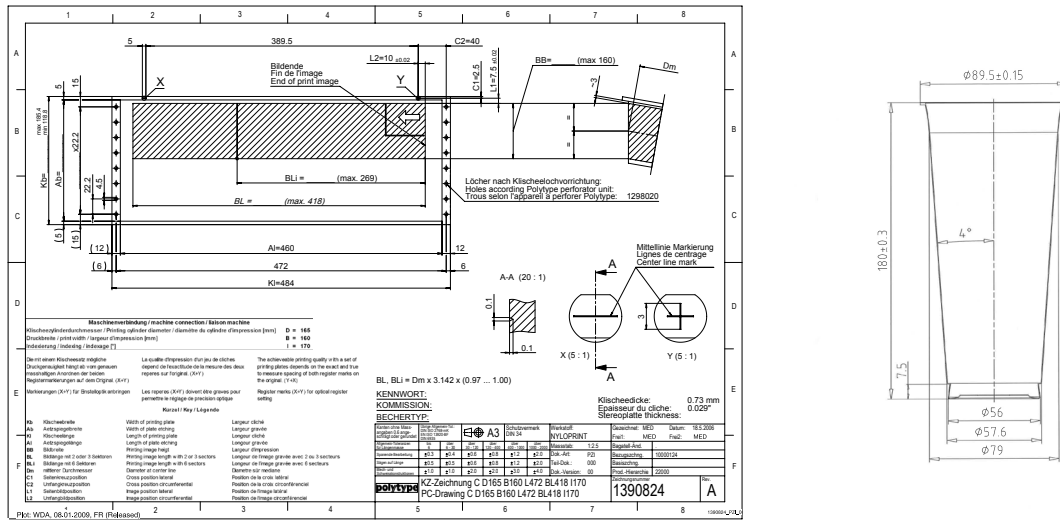

## Barcodes:

- Barcodes is preferred in 100% for good readability, but we can go down to minimum 80%.
- There has to be a box around the barcode in a min size of 21 x 39 mm for a 100% code. This will allow good readability of the code.
- The lines of the barcode should always follow the printdirection to improve the readability.

**General information:**

- Please supply us with a cup or cup drawing if you are interested in Wave Warp or Shape adjustment
- Please also supply us with a machinedrawing

- Always send the image and font data separately with your files
